

What is Citizen Science?

Citizen science is real science done by everyday people like you! Whether you're helping scientists monitor local air quality or sharing pictures from your garden to help track plant and species populations, there are resources to help you engage in your interests, from Astronomy to Zoology!

Let Us Know!

What are you interested in investigating through participatory science programs?

Write your answer(s) on the "leaves" provided and post them on the tree below!

What type of citizen science have you participated in?

Examples: air quality, nature, health and medicine, space, animals, etc.
